## **MSD Sewer Construction Update – 7 April 2017**

Here are the latest updates on the MSD sewer work currently underway in your neighborhood.

New sewer pipe installation is 95% complete with crews having installed 9500 linear feet of pipe to date. Crews continue to connect remaining sewer laterals to the new system. Sidewalk and driveway approach replacement due to construction continues as weather permits. Asphalt paving design has been approved by U City Public Works and is awaiting MSD approval. Crews continue to place base concrete at the excavation trench locations as weather allows.

The following work is scheduled to take place over the next couple of weeks:

- Final asphalt paving at the 1400 block of Mendell
- Crews will be installing storm sewer pipe on 78th.
- Installation of base concrete along Trenton and Birchmont
- Restoration of sidewalks demolished during construction
- Installation of remaining 6 sewer laterals

Driving or walking in a construction area can be dangerous for residents and motorists so please allow yourself additional time going to and coming from your home.

We will send out regular updates to keep you informed and if you have specific concerns or questions please contact U. City Public Works at 314.505.8560 or J.H. Berra at 314.487.5617 or MSD at 314.768.6200
