

Between the LIONS

U City Community Update

January 19, 2024

Get ready to embrace the winter chill and enjoy the magic of the 17th Annual Loop Ice Carnival! This beloved winter tradition is back, promising a day of frosty fun for the whole family.

Join us in the vibrant Delmar Loop, where the streets will come alive with enchanting ice sculptures, dazzling ice carving demonstrations, and an electrifying drone show. Marvel at the incredible craftsmanship from Full Spectrum Ice as they transform blocks of ice into breathtaking works of frozen art.

For those seeking adventure, participate in our Temporary Tattoo Scavenger Hunt. Visit participating businesses and collect temporary tattoos throughout the carnival area. It's a fun and interactive way to explore the event and win a prize! [Read More](#)

TUESDAY, FEBRUARY 13
5:30 PM-7:00 PM

COMING SOON

Remove any snow on your vehicle's windows, lights, brake lights and signals.
Make sure you can see and be seen.

Leave plenty of time to reach your destination safely. It's not worth putting yourself and others in a dangerous situation just to be on time.

Roads that seem dry may actually be slippery - and dangerous. Take it slow when approaching intersections, off-ramps, bridges or shady areas - all are hot spots for black ice. Remember, Ice and Snow, Take It Slow.

On snow and ice, go slowly, no matter what type of vehicle you drive. Even if you have an SUV with four-wheel drive you may not be able to stop any faster, or maintain control any better, once you lose traction. Four-wheel drive may get you going faster, but it won't help you stop sooner.

Stay attentive and reduce speed. Know what's going on around you.

Give snowplows room to work. The plows are wide and can cross the centerline or shoulder. Don't tailgate and try not to pass. If you must pass, take extreme caution and beware of the snow cloud.

Snowplows travel below the posted speed limit. Be patient. Allow plenty of time to slow down. Remember, Ice and Snow, Take It Slow.

A snowplow operator's field of vision is restricted. You may see them, but they don't always see you. Keep your distance and watch for sudden stops or turns.

The faster you're going the longer it will take to stop. When accelerating on snow or ice, take it slow to avoid slipping or sliding. Ice and Snow, Take It Slow.

Give yourself space. It takes extra time and extra distance to bring your car to a stop on slick and snowy roads. Leave extra room between you and the vehicle in front of you

Brake early, brake slowly, brake correctly and never slam on the brakes. If you have anti-lock brakes, press the pedal down firmly and hold it. If you don't have anti-lock brakes, gently pump the pedal. Either way, give yourself plenty of room to stop.

When driving on ice and snow, do not use cruise control and avoid abrupt steering maneuvers. When merging into traffic, take it slow. Sudden movements can cause your vehicle to slide
